Narrow petaled dark maroon-purple shading to almost white edges.
Molten gold with vermilion eye.
Orange and violet, flame tipped petals.
Carmine rose; fuchsine pink throat.
Large white with yellow beige sepals.
Very fine two-toned orange.
Vermilion, flecked with very light pink.
Outer petals chinese red; inner petals violet-purple with red stripe.

alizing the unusual''

EPIPHYLLUMS

Of all the beautiful flowering plants imported from the four corners of the earth, none can excel the Epiphyllums in spectacular appeal. Although native to the tropical countries such as Brazil, Mexico and the Argentine, the majority of these gorgeous types have in the past been hybridized in Europe. And now in our own Southern California numerous, superior kinds have been developed.

One could imagine nothing more congenial to Southern California climate and modern day architecture than these streamlined plants bearing a profusion of strikingly beautiful flowers from 6 to 10 inches in diameter, in all the colors of the rainbow. There are white kinds fringed in lime yellow and soft brown, pinks in monotone or iridescent tints, purples with flame and chartreuse, molten gold with vermilion, bronze with scarlet, blood-red with violet and others too numerous to mention.

Some types are effective in wall or hanging baskets, but the majority display their charms to best advantage when trained against a trellis or wall.

Our "Jeweled Corridor" during May and June presents a spectacle of dazzling beauty that you cannot soon forget. Bring your friends and give them a real treat.

COOLIDGE GARDENS

EPIPHYLLUMS

CULTURE

For best results, plant your Epiphyllums in a semi-shady location in a mixture of 80% leafmold (preferably coarse), 10% steer manure and 10% Vita Peat.

For fertilizing, give a heavy dressing of steer manure and bone meal (a 4" pot heaping full of bone meal to a sack of steer manure) in February and again after flowering and when the plants begin to grow.

Keep them moderately moist, varying with the seasons, and be sure that their drainage is good.
